Replacement Indications

Signs of wear and deterioration can indicate that it's time to replace your safety cabinet. Did you know that rust and other modifications can mean your cabinet no longer meets code? Modifications can include:

- ✘ Welding I-bolts to assist with moving the cabinet
- ✘ Door doesn't close properly
- ✘ External attachments to dispense liquids
- ✘ Adding a padlock or drilling any hole in the cabinet
- ✘ Any venting added

Color Options

The following are industry best practices for selecting colors based on what is being stored:

YELLOW:
Flammable liquids

RED:
Paints, inks and other combustible liquids

BLUE:
Corrosives (acids, bases, oxidizers)

GREEN:
Pesticides and insecticides

GRAY:
Hazardous materials

State Requirements

Self-closing doors give you peace of mind that your team is protected, but did you know that some states and municipalities require self-closing doors?

Jamco Flammable Safety Cabinets help keep companies compliant and are FM tested and approved. They also meet OSHA, NFPA code 30, and UFC 79 standards. As always, check with your local municipality to see if a self-closing door is required.

STATES REQUIRING SELF-CLOSING DOORS

■ Required ■ Some municipalities

Cabinet Models

Under-counter, countertop, narrow, self and manual close—Jamco has all the popular sizes and configurations.

Gallon Capacity	6	11	12	15	18	22	24	28	30	44	45	60	90	120
